

Fourth Grade Newsletter - May 2018

Beautiful May is upon us, and June is nipping at her heels! It won't be long before we are enjoying the last days with each other as our fourth grade class continues to glide towards summer vacation!

We begin this month with the fourth graders planning Mass for the morning of May 3. Everyone is always welcome to attend. Families may always sit with their favorite fourth grader.

Remember our school spring concert is scheduled for Thursday, May 24 at 6:30. Please meet your teachers in Paulik Hall by 6:00.

Reading class begins this month with a selection entitled, *Anatomy of a Volcanic Eruption*. Our last two reading stories have supported our science class study of the earth.

Fourth graders should be putting the final touches on their *Famous Wisconsinite* projects. Students will be presenting their project on Friday, May 11.

Fourth graders are continuing the *Family Life* program this month. We are learning about human growth and development. We are learning more about being responsible adults and making good choices for our families and ourselves.

Accelerated Reading is in the final phase for our class. Students have taken Star tests to find individual reading levels. Each child knows what his or her goal point is. Students continue to make their goals for this last quarter.

Grandparents/Special Friends Day is scheduled for Friday, May 25. We will gather at church for a 9:30 Mass. After church we will go back to school to show off our classroom until 11:30 dismissal.

Warmer weather brings about a current among the students of restlessness and longing for summer break. Please continue to remind your child how important fourth quarter is. We want to finish strong and land on our feet!

Enjoy the sunshine!
