

Mrs. Gordon's Monthly Newsletter

May 2018

Happy May Day! I look forward to helping the students fine tune their reading, writing, and math skills during this last month of the school year. I feel confident that they will all find success next year.

Here is what we are doing in our classroom this month:

Science: We will learn about water as a habitat and which living things live in water. We will also learn about different types of insects.

Social Studies: As we learn about water as a habitat we will talk about what needs to be done to keep the environment clean for all creation.

Math: The students will classify objects and count the number of objects in each category. They will also review the processes of addition and subtraction.

Religion: We will discuss kindness, forgiveness, God's rules, and His blessings on us.

Reading: The new words for this month are: out, read, walk, happy, friends, because, said, sad, when, you.
